

# Pestalozzi's Relevance to Educational Movements in Your Country

Advanced (Classes 11-12)

Intermediate (Classes 7-10)

## Pestalozzi's Influence on Modern Education (Pestalozzi Approach)

### Part 1

The facilitator leads the participants in a brainstorm of Pestalozzi's educational philosophy

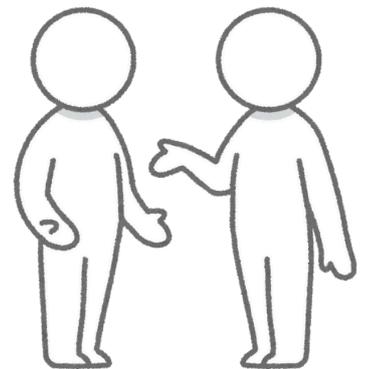

*{NB: This session should follow sessions using the Teaching Ideas 'Overview of Pestalozzi's Approach to Education, 'Changes Pestalozzi brought to Education' and 'Pestalozzi's Influence on Modern Education'}*

The facilitator asks the participants if they know of any educational movements or ideas in their own countries, either from the past or happening currently, which show similarities to Pestalozzi's approach.

*(NB: These may be ideas of individuals not necessarily directly involved in education. If it is difficult to find movements or ideas originating from the students' own country, then they should research movements and ideas which have influenced the education of their country.)*

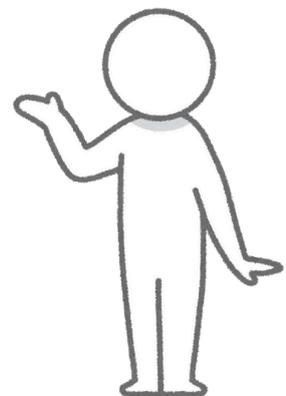

### Materials Needed

Access to the Internet and to a library

### Instructions to participants:

- Find out about educational ideas and movements of your own countries, using the Internet and/or a library
- List any similarities to and differences from Pestalozzi's philosophy of education that you notice

### Part 2

The participants discuss their findings and the facilitator lists movements or individuals found by the participants on the board.

This session can lead into further research on educational movements or the ideas of individuals local to the participants and the influence they have had on education.
